Using search in your Kinderloop

Looking for an older post, a particular child, a learning tag or something you know you've seen before? Kinderloop Search gives you a few simple ways to find exactly what you need.

Here's how to get started...

Start with the Search icon

Click the Search icon at the top of your Kinderloop feed.

From here you can choose:

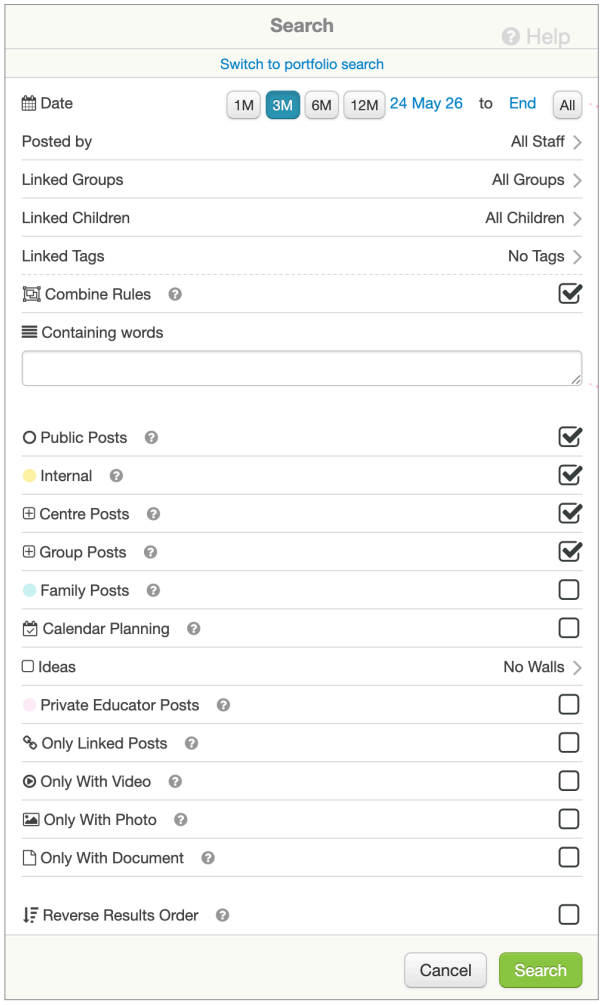

Advanced Search

Search across your service using dates, children, groups, tags, post types and more.

Portfolio Search

Quickly view posts connected to one particular child.

You can also return to searches you've previously saved.

Advanced Search

Advanced Search lets you narrow down exactly what you are looking for.

At the top, choose the **date range** you would like to search, such as

1 month, 3 months, 6 months, 12 months, your own selected dates or All.

If you are looking for an older post, make sure your selected date range goes back far enough.

You can then search by:

• Posted by • Linked Groups • Linked Children • Linked Tags
• Words contained within the post

You can also choose which types of posts you would like included, such as Public Posts, Internal Posts, Centre Posts, Group Posts, Family Posts, Calendar Planning, Ideas or Private Educator Posts.

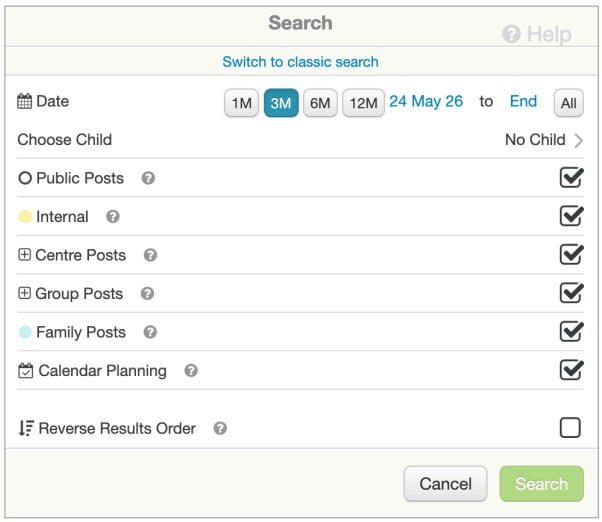

Need something even more specific? You can also search for posts containing photos, videos or documents.

Combine Rules

Use Combine Rules when you want your **selected filters to work together**. For example, you might search for a particular child, within a selected date range, that has your Observation tag attached.

This is a handy way to narrow down your results without scrolling through lots of unrelated posts.

Using search in your Kinderloop

Portfolio Search

If you simply want to look back through one child's documentation, Portfolio Search is often the quickest option.

Choose **Portfolio Search**, select the child, choose your date range and search.

Save a Search

Have a search you use regularly?

Save it so you don't need to set up the same filters each time.

Your saved searches will appear directly under the Search menu, making it easy to come back to them whenever you need them.
