Children's goals in your Kinderloop

Track, celebrate and share children's learning journeys. The new Goals feature makes it easy to set individual learning goals, collect evidence over time, communicate with families, and celebrate achievements.

If you don't already use Goals, here's how to get started...

1. Create your first goal

Go to **Settings > Goals**, or search for and open a child's profile, then select Goals.

Click the green **+ Add Goal** button.

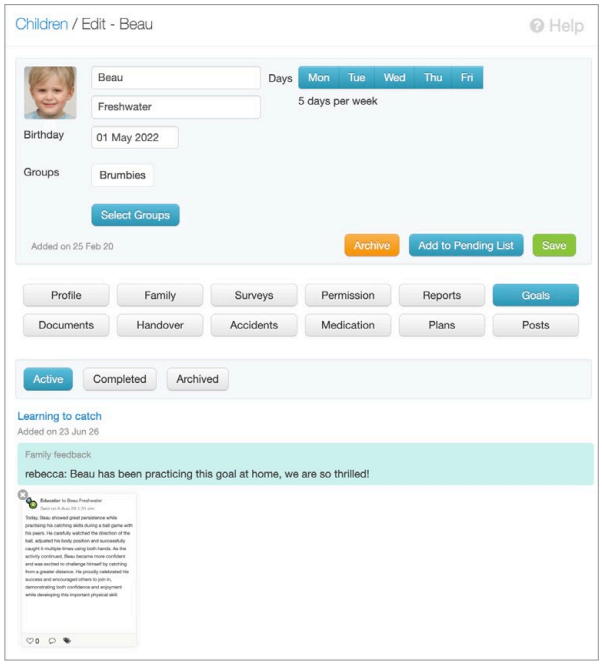

Enter a goal title and description. Any goals you create are automatically saved so they can be reused for other children in the future.

2. Add evidence

Once a goal has been created, it will remain linked to the child while they work towards achieving it.

Create posts as you normally would, then link those posts as evidence to show the child's progress. You can also add notes to record reflections, achievements or next steps.

Tip: Create a tag such as Goal to make it easy to find all of your goal-related posts.

3. Share progress with families

Goals are automatically shared with families, allowing them to follow their child's learning journey.

Families can:
- View the goal and its progress.
- Read the linked posts and notes.
- Add comments and feedback to contribute to their child's learning journey.

4. Complete a goal

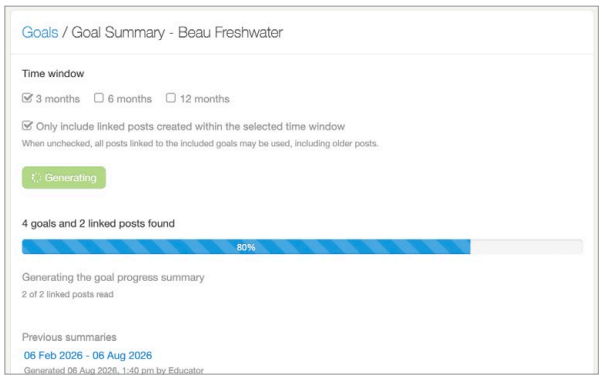

When a child has achieved their goal, simply click **Complete**.

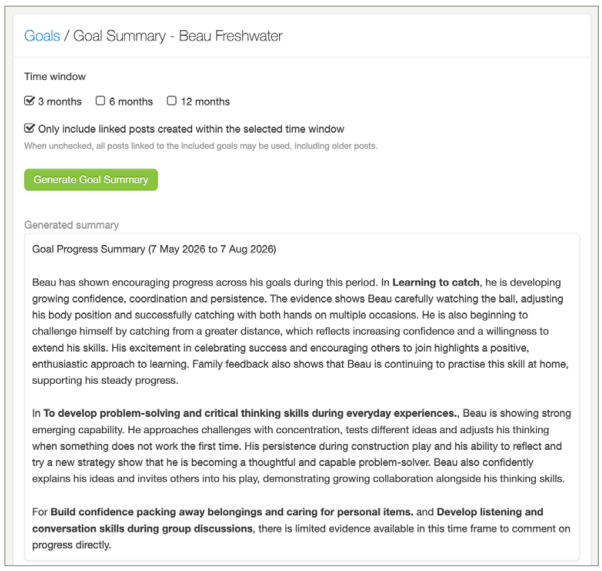

Completed goals remain available as part of the child's learning history and can be viewed at any time.

5. Finding goals

You can access Goals at any time by going to **Settings > Goals**, or opening a **child's profile and selecting Goals.**

Goal Summaries with Kinderloop Magic (Optional)

Generate an AI-powered summary of a child's progress across their goals using Kinderloop Magic.

- Uses **2 Magic Credits** per summary.
- Turn **Kinderloop Magic** on in **Options**.
- If preferred, Magic can be enabled **only for Goal Summaries**, while remaining disabled for posts.

Privacy: Goal Summaries only analyse the text within linked posts and the Goals area. Photos are never scanned or analysed.

Using Goal Summaries is completely optional. The Goals feature works exactly the same whether or not you choose to use Kinderloop Magic.
